Portfolio: ariful10159.netlify.app

Professional Summary

Computer Science undergraduate with hands-on experience in Flutter, IoT, and AI/ML projects. Passionate about building practical software solutions and contributing to real-world development projects.

Technical Skills

Programming Languages: C, C++, Java, Python, Dart, PHP
Embedded Systems & IoT: Arduino, ESP8266, ESP32, Raspberry Pi, Sensor Integration, MQTT, HTTP
Web, App & Backend: HTML, CSS, Node.js, FastAPI, Firebase, Flutter
Databases: MySQL, PostgreSQL, MongoDB
Machine Learning & AI: Machine Learning, Deep Learning, Computer Vision, Data Analysis, OpenCV
Tools & Platforms: Git, GitHub, Visual Studio Code, Linux

Projects

- IoT Health Monitoring System (Course & Research Project):** Built an IoT-based health monitoring system using biomedical sensors and embedded devices for real-time patient data collection, monitoring, and remote transmission. GitHub: <https://github.com/ariful10159/IOT-Project>
- FruitIQ – Intelligent Robotic Arm (Course Project):** Built and programmed an intelligent fruit-sorting robotic arm using computer vision and Raspberry Pi 5 for automated fruit detection, classification, and sorting. GitHub: <https://github.com/ariful10159/FruitTQ—Intelligent-Robotics-Arm>
- Autonomous Fire Detection Robot (Personal Project):** Built and programmed an autonomous fire-fighting robot using Arduino, integrating sensors and actuators for flame detection, navigation, and extinguishing.
- Blood Donation Application (Client Project):** Developed a mobile application to connect blood donors and recipients, featuring donor registration, blood group-based search, and communication support for emergency blood requests. GitHub: https://github.com/ariful10159/Blood_Donation_Application (private)

Publication

- Medicare: Seamless IoT Health Data Acquisition, Visualization, and Machine Learning Based Diabetes Prediction** — Accepted at an IEEE International Conference. Developed an IoT-based framework for real-time health data acquisition, visualization, and remote monitoring. Integrated machine learning techniques for diabetes prediction using collected patient health data. IEEE Xplore: <https://ieeexplore.ieee.org/document/11502396>

Education

Bachelor of Science in Computer Science and Engineering Expected June 2027
Patuakhali Science and Technology University, Dumki, Patuakhali, Bangladesh

Higher Secondary Certificate (Science) Year: 2021 | GPA: 5.00
Paruara Abdul Matin Khusru College, Cumilla

Certifications & Achievements

- Certified Database Programmer (MySQL/Oracle/SQL Server):** Successfully completed an academic database training program organized by the Department of CSIT, PSTU in collaboration with the ICT Division, Government of Bangladesh.
- Served as an **IoT workshop trainer**, conducting practical sessions on embedded systems, sensors, and real-world IoT applications.
- Achieved **2nd place** in an IoT/project-based competition by developing and presenting an innovative technical solution.

Languages

- Bangla — Native
- English — Professional Working Proficiency

Interests

Advanced Data Science, IoT & Robotics, Academic Research, Advanced App Development
